EXPERIENCE

Full Stack Developer   National Processing | Paymentbox

November 2022- October 2024

- Led frontend development efforts for a new application, establishing a design system that enhanced UI consistency and user experience.

- Collaborated with cross-functional teams and departments to gather requirements, ensuring alignment with company objectives.

- Played a pivotal role in building a new website, from scratch. Collaborated on system design and implemented a comprehensive design system, resulting in a visually appealing and user-friendly platform.

- Utilized backend technologies including PHP and Laravel, and frontend technologies such as TypeScript and React to deliver robust solutions.

Software Engineer   Impact Suite

October 2021 - November 2022

- Worked closely with other developers to create and improve our current suite of mobile and web applications. Working in Flutter and

- Led development of internal reporting and analytic tools leading to an increase in revenue.

- Mentored and helped train new developers on the team in React and created documentation for a better onboarding experience.

- Contributed to our in house UI library and helped create custom packages for our mobile applications.

- Implemented a restful API built in Ruby to connect to our suite of mobile and web applications
